

Idaho State Action Plan Table 2026 Application/2024 Annual Report					
Priority Needs	Five-Year Objectives	Strategies	Evidence-Based or –Informed Strategy Measures	National and State Performance Measures	National and State Outcome Measures
Women/Maternal Health					
Improve access to quality prenatal and postpartum healthcare to promote patient safety	By September 2030, increase the number of healthcare providers and perinatal support workers who receive training on educating patients to recognize maternal warning signs and postpartum complications.	Support healthcare professional and perinatal support worker training to enhance patient education on recognition of maternal warning signs and postpartum education.	ESM PPV.1 - Percentage of healthcare providers and perinatal support workers who participated in the training who report increased confidence in providing postpartum complication education and recognition of maternal warning signs to enhance postpartum safety.	NPM - Postpartum Visit	Linked NOMs: Maternal Mortality Neonatal Abstinence Syndrome Women's Health Status Postpartum Depression Postpartum Anxiety
Maintain access to effective and affordable reproductive health services	By September 2030, increase the percentage of women ≤200% of FPL using a most to moderately effective contraceptive method.	Collaborate with the Idaho Family Planning Program to maintain access to low-cost contraception methods to ensure greater utilization and uptake for all women, including those during the postpartum period.	No ESMs were created by the State. ESMs are optional for this measure.	SPM 1: Contraception Use. Percent of women ≤200% of FPL, including postpartum women, using a most or moderately effective contraceptive method.	
Perinatal/Infant Health					
Increase access to quality, risk-appropriate, perinatal care	By September 2030, increase the percentage of live births occurring in a birthing facility participating in patient safety bundle implementation from 67% to 75%.	Implement quality improvement initiatives that are adaptable to all levels of maternity care and promote aspects of risk-appropriate perinatal care.	ESM RAC.1 - Percent of Idaho live births occurring at a birthing facility participating in patient	NPM - Risk-Appropriate Perinatal Care	Linked NOMs: Stillbirth Perinatal Mortality Infant Mortality Neonatal Mortality

Priority Needs	Five-Year Objectives	Strategies	Evidence-Based or –Informed Strategy Measures	National and State Performance Measures	National and State Outcome Measures
to improve health outcomes			safety bundle (PSB) implementation.		Postneonatal Mortality Preterm-Related Mortality
Expand MCH data capability and utilization	By September 2030, increase the number of partnerships to expand MCH data capability and improve maternal and child health outcomes.	Develop strategic partnerships with key stakeholders to expand MCH data capability and utilization to track and improve maternal and child health outcomes.	ESM RAC.1 - Percent of Idaho live births occurring at a birthing facility participating in patient safety bundle (PSB) implementation.	NPM - Risk-Appropriate Perinatal Care	<u>Linked NOMs:</u> Stillbirth Perinatal Mortality Infant Mortality Neonatal Mortality Postneonatal Mortality Preterm-Related Mortality
Child Health					
Improve systems of care	By September 2030, increase the number of providers serving children that receive education or technical assistance about the components of an effective medical home model.	Year 1: Gain understanding of which Medical Home subcomponent(s) will best address children’s and families’ needs by completing an environmental scan of the Idaho service landscape.	ESM MH.1 - Conduct environmental scan to determine current medical home model services landscape in Idaho.	NPM - Medical Home	<u>Linked NOMs:</u> Children's Health Status CSHCN Systems of Care Flourishing - Young Child Flourishing - Child Adolescent - CSHCN Flourishing - Child Adolescent - All
Improve access to preventative services and screenings	By September 2030, expand the types of dental program partnerships supporting oral health programs for children.	Collaborate with the Oral Health Program to provide community and school-based dental programs in geographic areas with dental care shortages.	<i>Inactive - ESM PDV-Child.1 - Percentage of 3rd grade students that had dental sealants on at least one tooth recommended for sealants</i> ESM PDV-Child.2 - Number of partnerships established between school districts, public health districts, Head Start, WIC, and community-based programs to support oral health programs.	NPM - Preventive Dental Visit - Child	<u>Linked NOMs:</u> Tooth decay or cavities Children's Health Status CSHCN Systems of Care

Priority Needs	Five-Year Objectives	Strategies	Evidence-Based or –Informed Strategy Measures	National and State Performance Measures	National and State Outcome Measures
Adolescent Health					
Promote safe and healthy development	By September 2030, increase the annual percent of school staff trained to deliver mental health education, screenings, and support services by 3%.	Support school-based mental health initiatives through partnership with the Suicide Prevention Program to improve youth mental health.	ESM MHT.1 - Increase school staff trained to deliver mental health education, screenings, and support services annually by 3%.	NPM - Mental Health Treatment	Linked NOMs: Adolescent Mortality Adolescent Suicide Adolescent Firearm Death Adolescent Injury Hospitalization Children's Health Status Adolescent Depression/Anxiety CSHCN Systems of Care Flourishing - Child Adolescent - CSHCN Flourishing - Child Adolescent - All
Children with Special Health Care Needs					
Improve systems of care	By September 2030, increase the number of providers serving CSHCN that receive education or technical assistance about the components of an effective medical home model.	<p>Year 1: Gain understanding of which Medical Home subcomponent(s) will best address CSHCN families' needs by completing an environmental scan to determine current medical home model services landscape in Idaho.</p> <p>Year 1: Create CSHP strategic plan that aligns with CSHCN population needs to improve focus on providing better access to services.</p>	ESM MH.1 - Conduct environmental scan to determine current medical home model services landscape in Idaho.	NPM - Medical Home	Linked NOMs: Children's Health Status CSHCN Systems of Care Flourishing - Young Child Flourishing - Child Adolescent - CSHCN Flourishing - Child Adolescent - All
