Women/Maternal Health					
<p>Improve the health of reproductive age individuals</p>	<p>1a. As part of postpartum/interconception care, partner with home visitation programs (Healthy Start, Children First) to promote the importance of postpartum visits, well woman visits, and early prenatal care for future pregnancies.</p> <p>1b. Continue disseminating the postpartum postcards encouraging new mothers to attend their postpartum visit and follow-up on any health issues.</p> <p>2a. Participate in the Medicaid and CHIP Postpartum Affinity Group's quality improvement project with the Oklahoma Health Care Authority.</p> <p>2b. Educate reproductive age males and females on being healthy before and between pregnancies through community baby showers, health fairs, March of Dimes walks, and public service announcements.</p> <p>2c. Educate health care providers on the importance of preconception health education and screening through Oklahoma Perinatal Quality Improvement Collaborative activities, Maternal Mortality Review, and local prenatal care services in county health departments.</p>	<p>1. Increase the number of women returning for the postpartum visit from 88.0% in 2016-2019, 2021 to 96.0% in 2025.</p> <p>2. Improve birth intention by increasing the usage of the most effective methods of contraception among women on Medicaid and at risk for unintended pregnancy from 16.7% in 2022 to 20.0% in 2025.</p>	<p>NPM 1: Percent of women, ages 18 through 44, with a preventive medical visit in the past year</p>	<p><i>Inactive - ESM 1.1: The number of service sites and community partners utilizing the new preconception assessment tool developed by the Oklahoma State Department of Health and CollN team</i></p> <p>ESM 1.2: Percentage of mothers with Medicaid paid deliveries who had coverage 60 days – 12 months postpartum.</p>	<p>NOM 2: Rate of severe maternal morbidity per 10,000 delivery hospitalizations</p> <p>NOM 3: Maternal mortality rate per 100,000 live births</p> <p>NOM 4: Percent of low birth weight deliveries (<2,500 grams)</p> <p>NOM 5: Percent of preterm births (<37 weeks)</p> <p>NOM 6: Percent of early term births (37, 38 weeks)</p> <p>NOM 8: Perinatal mortality rate per 1,000 live births plus fetal deaths</p> <p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.2: Neonatal mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p> <p>NOM 9.4: Preterm-related mortality rate per 100,000 live births</p>

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
					<p>NOM 10: Percent of women who drink alcohol in the last 3 months of pregnancy</p> <p>NOM 11: Rate of neonatal abstinence syndrome per 1,000 birth hospitalizations</p> <p>NOM 23: Teen birth rate, ages 15 through 19, per 1,000 females</p> <p>NOM 24: Percent of women who experience postpartum depressive symptoms following a recent live birth</p>
<p>Increase quality health care access for the MCH population</p>	<p>Promote the importance of reproductive life planning through utilization of the preconception health client engagement tool and My Life. My Plan for adolescents.</p> <p>Disseminate the client engagement tool for reproductive health planning through the Maternal Health Task Force.</p> <p>Promote LARCs to prevent unintended pregnancies and closely spaced pregnancies in county health departments and Medicaid recipients.</p> <p>See activities to reduce teen pregnancy in the Adolescent Health Plan.</p>	<p>Reduce the rate of unintended pregnancies (mistimed or unwanted) among mothers who have live births from 27.5% in 2021 to 25.0% by 2025.</p>	<p>NPM 1: Percent of women, ages 18 through 44, with a preventive medical visit in the past year</p>	<p><i>Inactive - ESM 1.1: The number of service sites and community partners utilizing the new preconception assessment tool developed by the Oklahoma State Department of Health and CollIN team</i></p> <p>ESM 1.2: Percentage of mothers with Medicaid paid deliveries who had coverage 60 days – 12 months postpartum.</p>	<p>NOM 2: Rate of severe maternal morbidity per 10,000 delivery hospitalizations</p> <p>NOM 3: Maternal mortality rate per 100,000 live births</p> <p>NOM 4: Percent of low birth weight deliveries (<2,500 grams)</p> <p>NOM 5: Percent of preterm births (<37 weeks)</p> <p>NOM 6: Percent of early term births (37, 38 weeks)</p> <p>NOM 8: Perinatal mortality rate per 1,000 live births plus fetal deaths</p> <p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.2: Neonatal mortality rate</p>

Perinatal/Infant Health					
Reduce infant mortality	<p>1. Provide safe sleep training and technical assistance to birthing hospitals.</p> <p>2. Provide training and technical assistance to home visiting programs, child care centers, and other community and health organizations that address the needs of newborns and infants.</p> <p>3a. Assign a person from the Infant Safe Sleep Work Group to assist with social media projects.</p> <p>3b. Develop partnerships to assist in finding families and individuals willing to share their experiences and stories about infant safe sleep and breastfeeding.</p> <p>3c. Work with the Department of Communications on creating the PSAs and marketing them appropriately to social and traditional media sources.</p>	<p>1. Increase the number of hospitals participating in the Safe Sleep Sack Program from 27 in 2019 to 35 in 2025.</p> <p>2. Increase the number of trainings and community outreach activities by Infant Safe Sleep Work Group members for providers and professional organizations on infant safe sleep from 10 in 2020 to 20 in 2025.</p> <p>3. Join with internal partners and outside community partners to create culturally competent public service announcements (PSAs) and messages that focus on integrating infant safe sleep and breastfeeding messages for each population with disproportionately high infant mortality rates by 2025.</p>	NPM 5: A) Percent of infants placed to sleep on their backs B) Percent of infants placed to sleep on a separate approved sleep surface C) Percent of infants placed to sleep without soft objects or loose bedding	<p><i>Inactive - ESM 5.1: The percentage of infants delivered at birthing hospitals participating in the sleep sack program</i></p> <p>ESM 5.2: Percent of infants put to sleep on their back among Cribs Program participants.</p>	<p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p> <p>NOM 9.5: Sudden Unexpected Infant Death (SUID) rate per 100,000 live births</p>
Increase health equity for the MCH population	<p>1a. Provide safe sleep training and technical assistance to birthing hospitals with high numbers of African American and American Indian births.</p> <p>1b. Target specific populations through outreach efforts, including, community baby showers, health fairs, family conference partners (OFN,</p>	<p>1. Increase the percent of American Indian and African American births in hospitals participating in the Safe Sleep Sack Program, from 73.3% in 2018 to 80.0% in 2025.</p>	NPM 5: A) Percent of infants placed to sleep on their backs B) Percent of infants placed to sleep on a separate approved sleep surface C) Percent of	<p><i>Inactive - ESM 5.1: The percentage of infants delivered at birthing hospitals participating in the sleep sack program</i></p>	<p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p>

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
	<p>DHS), and local schools to increase education on safe sleep practices and guidelines.</p> <p>1c. Provide opportunities to train community leaders and educate non-traditional partners, including faith based organizations and non-profit organizations that help women and infants.</p> <p>2a. Work with Cribs Project partners to identify and educate families of infants on culturally and racially specific safe sleep practices.</p> <p>2b. Continue to evaluate the effectiveness of the crib project, by conducting a caregiver survey between one month and three months post distribution.</p>	<p>2. Increase the number of hospitals and other facilities serving American Indian and African American families participating in the Cribs Project, distributing pack-n-plays and safe sleep tools and education for families, from 5 in 2020 to 8 by 2025.</p>	<p>infants placed to sleep without soft objects or loose bedding</p>	<p>ESM 5.2: Percent of infants put to sleep on their back among Cribs Program participants.</p>	<p>NOM 9.5: Sudden Unexpected Infant Death (SUID) rate per 100,000 live births</p>
<p>Reduce infant mortality</p>	<p>1a. Coordinate with the WIC Breastfeeding Task Force to develop materials and participate in planning a variety of statewide breastfeeding trainings for WIC, county health department and independent agency staff, and statewide health care providers as they are scheduled.</p> <p>1b. Provide support for the Oklahoma Breastfeeding Hotline, the Oklahoma Hospital Breastfeeding Education Project, and the Becoming Baby-Friendly in Oklahoma (BBFOK) Project to increase the number of women receiving IBCLC care.</p> <p>1c. Provide support for the Oklahoma Mothers' Milk Bank (OMMB) efforts to provide safe, pasteurized milk donated by healthy, screened breastfeeding mothers to ensure that vulnerable babies can receive human milk to promote growth and development and help fight infections.</p> <p>2. Work with partners to identify and share best practice resources and tools, develop comprehensive online trainings and create or make available materials appropriate for providers and families, to include best breastfeeding and safe sleep practices.</p> <p>3a. Coordinate with partners to increase Oklahoma Breastfeeding Friendly Worksites, by reaching out to schools and child care centers via the Oklahoma Child Care Resource and Referral Association, Department of Education, and COBA.</p> <p>3b. Coordinate with the OSDH Center for Chronic Disease and Health</p>	<p>1. Increase the percent of mothers who breastfeed their infants at hospital discharge from 80.4% in 2018 to 85.0% by 2025.</p> <p>2. Increase the percent of mothers who exclusively breastfeed their infants through 6 months of age from 29.6% in 2016 to 35.0% by 2025.</p> <p>3. Increase the number of Oklahoma Breastfeeding Friendly Worksites, including schools and child care centers, from 380 sites in 2022 to 400 sites in 2025.</p>	<p>NPM 4: A) Percent of infants who are ever breastfed B) Percent of infants breastfed exclusively through 6 months</p>	<p><i>Inactive - ESM 4.1: The number of women receiving in-person, telehealth, or telephonic breastfeeding support Title V-funded services by IBCLCs.</i></p> <p>ESM 4.2: The percentage of births occurring in Oklahoma birthing hospitals designated as Baby-Friendly</p>	<p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p> <p>NOM 9.5: Sudden Unexpected Infant Death (SUID) rate per 100,000 live births</p>

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
	<p>Promotion and Department of Education to develop the Breastfeeding section of the Employee Wellness Practice Brief promoting BFF Worksites and offer professional development in breastfeeding education for teachers and administrators.</p> <p>3c. Coordinate with COBA to promote the activities in the strategic plan, including workplace law review and greater awareness of COBA's mission.</p>				
Increase health equity for the MCH population	<p>1a. Work with WIC to promote hiring ethnically diverse peer counselors.</p> <p>1b. Coordinate with the BBFOK Project to include at least one session focused on Reducing Racial and Ethnic Inequities in Breastfeeding in the yearly BBFOK Summit for hospital leadership teams.</p> <p>1c. Support COBA's efforts to promote breastfeeding among African American mothers and families through building partnerships with ethnically diverse organizations, such as Black Nurses Associations.</p> <p>1d. Target outreach to communities with low breastfeeding rates through community baby showers, health fairs, family partners, and local schools to increase education on breastfeeding guidelines and practices.</p> <p>1e. Increase the number of mothers with WIC who are exposed to at least seven of the Ten Steps to Successful Breastfeeding.</p>	1. Increase the percent of American Indian and Black mothers who exclusively breastfeed their infant to 8 weeks or more from 46.4% and 45.9% in 2016-2018 to 50.5% and 51.1% by 2025.	NPM 4: A) Percent of infants who are ever breastfed B) Percent of infants breastfed exclusively through 6 months	<p><i>Inactive - ESM 4.1: The number of women receiving in-person, telehealth, or telephonic breastfeeding support Title V-funded services by IBCLCs.</i></p> <p>ESM 4.2: The percentage of births occurring in Oklahoma birthing hospitals designated as Baby-Friendly</p>	<p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p> <p>NOM 9.5: Sudden Unexpected Infant Death (SUID) rate per 100,000 live births</p>
Improve access to social workers and support systems throughout the state	Share guidelines for supporting breastfeeding families in emergency situations with food pantries, professionals, and families.	Develop information and guidelines for food pantries, shelters, regarding supporting breastfeeding in emergency situations.	NPM 4: A) Percent of infants who are ever breastfed B) Percent of infants breastfed exclusively through 6 months	<p><i>Inactive - ESM 4.1: The number of women receiving in-person, telehealth, or telephonic breastfeeding support Title V-funded services by IBCLCs.</i></p> <p>ESM 4.2: The percentage of births occurring in Oklahoma birthing hospitals designated as Baby-Friendly</p>	<p>NOM 9.1: Infant mortality rate per 1,000 live births</p> <p>NOM 9.3: Post neonatal mortality rate per 1,000 live births</p> <p>NOM 9.5: Sudden Unexpected Infant Death (SUID) rate per 100,000 live births</p>

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
Increase quality health care access for the MCH population	<p>Continue to provide funding and technical assistance to Screening and Special Services for screening and follow-up services statewide.</p> <p>Collaborate with Screening and Special Services to offer multi-vitamins to family planning clients to increase folic acid consumption before and between pregnancies.</p>	Screen 100% of newborns in Oklahoma and maintain timely follow-up to definitive diagnosis and clinical management for infants with positive screens.	SPM 2: Infant mortality rate per 1,000 live births		
Increase quality health care access for the MCH population	<p>1a. Work with OPQIC to determine barriers to women accessing early prenatal care (physician preference, lack of access either geographically or lack of provider, insurance coverage, etc.).</p> <p>1b. Add new partnerships through the State Maternal Health Innovation Grant to expand access to early and adequate prenatal care.</p> <p>2. Promote the toolkit for providers regarding opioid use and treatment during pregnancy and postpartum.</p>	<p>1. Increase the number of women who receive prenatal care in the first trimester of pregnancy from 70.4% in 2018 to 77.9% by 2025.</p> <p>2. Reduce prevalence of substance-exposed newborns from 6.2 per 1,000 in 2016 to 5.0 in 2025.</p>	SPM 2: Infant mortality rate per 1,000 live births		
Reduce infant mortality	<p>1a. Contact delivering hospitals to increase participation in the PURPLE curriculum.</p> <p>1b. Provide training via webinars and ongoing support as needed to participating hospitals, including promotion of the new PURPLE app and data collection to assist in education efforts for abusive head trauma prevention, soothing, breastfeeding and safe sleep.</p> <p>1c. Assist a minimum of two community educators who work with grandparent groups to pilot the Grandparent Toolkit for Infant Care and Safety.</p> <p>2a. Continue to utilize the MCH staff member who is a certified CPS technician to assist Injury Prevention Services and Safe Kids Oklahoma with car seat checkup events and education throughout the year. In addition, county health department certified CPS staff will support families with car seats and installation and education.</p> <p>2b. Provide support and technical assistance to families and caregivers with car seat questions and concerns.</p>	<p>1. Increase the number of delivering hospitals participating in the Period of PURPLE Crying Abusive Head Trauma curriculum from 40 in 2020 to 42 by 2023.</p> <p>2. Reduce the rate of fatal motor vehicle injuries in children ages 0 to 5 from 3.2 per 100,000 in 2018 to 2.9 by 2024.</p>	SPM 2: Infant mortality rate per 1,000 live births		
Increase health equity for the MCH	1a. Review data on key contributors to infant mortality to determine what changes, if any, are necessary to work groups and programs to further address the high infant mortality rate in the state.	1. Revise the Preparing for a Lifetime annual report and one-pager on the initiative to educate	SPM 2: Infant mortality rate per 1,000 live births		

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
population	<p>1b. Engage workgroups and stakeholders on contributions to the annual report and community education.</p> <p>2a. Determine if there are emerging issues that need to be addressed by the initiative, including health equity and disparities.</p> <p>2b. Collaborate with the marketing team to develop messages on emerging issues and disperse them among social media, television, streaming applications, and radio.</p> <p>3a. Complete train-the-trainer program facilitator and participant guides and have reviewed by work group leaders and professional researchers for efficacy.</p> <p>3b. Train at least 10 professionals to deliver the training to their organizations.</p> <p>3c. Develop a tracking system to record the number of professionals and community liaisons trained on health disparities, implicit bias, and birth equity.</p> <p>4a. Implement a media campaign to educate families and providers on the benefits of aspirin therapy to help prevent pre-eclampsia, which potentially impacts prematurity and maternal morbidity and mortality rates. [New]</p> <p>4b. Create a toolkit for aspirin therapy awareness, with information for both families and providers. [New]</p> <p>4c. Create an evaluation plan for the aspirin therapy campaign with the Oklahoma Health Care Authority, to better understand the impact on low-income women in the state. [New]</p>	<p>the community and policymakers on topics impacting infant health by December 2024.</p> <p>2. Develop and implement two new marketing campaigns focused on diversity and equity in addressing infant health, including mortality and morbidity, by December 2024.</p> <p>3. Develop and implement a train-the-trainer program to educate 50 professionals and community liaisons on health disparities, implicit bias, and birth equity impacting infant health by December 2024.</p> <p>4. Implement a statewide aspirin therapy campaign, based on emerging evidence, for pregnant women and obstetric health care providers by December 2024. [New]</p>			

Child Health

Improve quality health education for children and	1. Continue to provide funding and contract monitoring for the the Oklahoma Center for Poison and Drug Information to provide presentations, educational materials on poisoning prevention and the hotline for possible poisoning incidents, as well as staffing for call response.	1. Via the Oklahoma Center for Poison and Drug Information provide poisoning and toxin prevention education presentations	NPM 8.1: Percent of children, ages 6 through 11, who are physically active at least 60 minutes	<i>Inactive - ESM 8.1.1: Number of schools participating in an activity (training,</i>	NOM 19: Percent of children, ages 0 through 17, in excellent or very good health

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
	<p>2a. Identify and work with existing youth groups in the Oklahoma Healthy YOUth coverage areas on adolescent health activities to build a Public Health Youth Council infrastructure.</p> <p>2b. Strengthen the MCH Youth Consultant project in partnership with the Oklahoma Family Network, and recruit at least two youth annually to provide input regarding adolescent health issues to MCH, CSHCN, and other programs within and outside of OSDH.</p> <p>2c. Provide TA and materials to Adolescent Health Specialists (AHS) on suicide prevention, bullying, positive youth development, and other adolescent health topics.</p> <p>2d. In partnership with youth, design a toolkit for 2024 National Adolescent Health Month.</p> <p>3a. Strengthen partnerships and work with the Oklahoma Department of Mental Health and Substance Abuse Services and the Oklahoma State Department of Education to provide training to parents and community members to understand the pervasiveness and the damaging effects of bullying, learn the signs of bullying and how to help schools and communities implement effective strategies to prevent the continuation of bullying in the community.</p> <p>3b. Develop a manual and train county health department health educators in social emotional learning to assist in training school staff and communities on this issue.</p> <p>3c. Recruit the two school districts for the Olweus bullying prevention program and begin implementation.</p>	<p>2. Conduct youth-informed public health activities with youth across the state regarding adolescent health issues, including teen pregnancy prevention, suicide prevention and bullying by 2024.</p> <p>3. Work with county health departments, Oklahoma State Department of Education, and local school districts to provide Olweus training and technical assistance with at least two school districts by May 2025.</p>		<p>ESM 9.2: Percent of SEL tools indicating a decrease in challenging behaviors among students who were given SEL presentations.</p> <p>ESM 9.3: Percent of teachers who reported that lessons related to topics on bullying prevention had a positive (high or medium) impact on their students.</p>	
<p>Improve quality health education for children and youth</p>	<p>1a. Maintain the number of adolescents participating in state-funded evidence-based teen pregnancy prevention programs by supporting the Adolescent Health Specialists in the counties.</p> <p>1b. Maintain the current number of adolescents participating in the Personal Responsibility Education Program (PREP).</p> <p>1c. Establish or leverage existing networks of administrators, principals,</p>	<p>1. Increase by 5% annually the number of adolescents participating in state or federally funded evidence-based teen pregnancy prevention programs (Baseline: 4,856 adolescents for the 2019-2020 school year).</p>	<p>NPM 10: Percent of adolescents, ages 12 through 17, with a preventive medical visit in the past year.</p>	<p><i>Inactive - ESM 10.1: The number of adolescents trained on Teen Pregnancy Prevention/Positive Youth Development curriculum</i></p>	<p>NOM 16.1: Adolescent mortality rate ages 10 through 19, per 100,000</p> <p>NOM 16.2: Adolescent motor vehicle mortality rate, ages 15 through 19, per 100,000</p>

Priority Needs	Strategies	Objectives	National and State Performance Measures	Evidence-Based or –Informed Strategy Measures	National and State Outcome Measures
	<p>teachers, school nurses, health educators, adolescent health specialists, community leaders, and parents who are advocates for evidence-based education.</p> <p>1d. Coordinate and/or provide training on evidence-based curricula for new PREP and state-funded teen pregnancy prevention staff and interested partners annually or as needed.</p> <p>2. Work with local healthcare providers and agencies to review and adapt (as needed) any existing materials related to expectant and parenting youth. [Revised]</p> <p>3a. Collaborate with state and community partners on teen pregnancy prevention and sexual violence prevention activities.</p> <p>3b. Monitor fidelity logs for documentation of consent education provided before, during, or after implementation of evidence-based teen pregnancy prevention curricula, as required by law.</p> <p>4a. Identify areas of highest need based on most current data available.</p> <p>4b. Partner with county health department regional directors in the areas of highest need to begin targeted prevention efforts.</p> <p>4c. Establish partnerships with tribal organizations and collaborate on professional development activities and service provision to adolescents in their jurisdictions.</p> <p>5a. Evaluate the planning and implementation process for the 2023 Adolescent Health Summit based on participant and planning group feedback. [New]</p> <p>5b. Convene a committee to assist in planning and implementation of the 2025 Summit. [New]</p>	<p>2. Work with local agencies and healthcare professionals to deliver training on how to provide youth-friendly, high-quality services to expectant and parenting teens by 2026.</p> <p>3. Consent education will be provided at least once to all participants in the evidence-based teen pregnancy prevention curricula classes, and to at least 14 schools as a stand-alone presentation by December 2024.</p> <p>4. Expand coverage of state or federally funded, age-appropriate, evidence-based teen pregnancy prevention projects in rural counties with teen birth rates higher than the national average from 46 in 2022 to 74 by 2024.</p> <p>5. Plan and host the 3rd biennial Adolescent Health Summit to provide education and resources for youth-serving professionals and parents/caregivers of youth by 2025. [Revised]</p>		<p>ESM 10.2: Percent of students participating in the PREP and Healthy Youth programs who reported they were more likely to better understand what makes a relationship healthy.</p>	<p>NOM 16.3: Adolescent suicide rate, ages 15 through 19, per 100,000</p> <p>NOM 17.2: Percent of children with special health care needs (CSHCN), ages 0 through 17, who receive care in a well-functioning system</p> <p>NOM 18: Percent of children, ages 3 through 17, with a mental/behavioral condition who receive treatment or counseling</p> <p>NOM 19: Percent of children, ages 0 through 17, in excellent or very good health</p> <p>NOM 20: Percent of children, ages 2 through 4, and adolescents, ages 10 through 17, who are obese (BMI at or above the 95th percentile)</p> <p>NOM 22.2: Percent of children, ages 6 months through 17 years, who are vaccinated annually against seasonal influenza</p> <p>NOM 22.3: Percent of adolescents, ages 13 through 17, who have received at least one dose of the HPV vaccine</p> <p>NOM 22.4: Percent of adolescents, ages 13 through 17, who have received at least one dose of the Tdap vaccine</p>
